Foreword

In the first half of FY 2007, mainly due to an increase in net interest income, Chiba Bank recorded ¥40.0 billion of real net business income (an increase of ¥1.2 billion, 3.2% up on the corresponding period of the previous fiscal year), the highest in its history.

As net credit costs showed a profit of ¥3.5 billion due to a reversal of allowances for doubtful claims, the Bank recorded an interim net income of ¥27.2 billion, also the highest in its history.

Today we would like to give an outline of our results for the first half, the performance in our principal product areas and our future strategies based on our mid-term business plan “Going forward with the Region: 100 weeks of trust and growth”
