Chiba Bank

Chibagin Securities

Problems pointed out by the Kanto Local Finance Bureau (June 23)*1

1. **Situation of the inducement to structured bonds without confirming and considering customer attributes**
2. **Insufficient situation of internal control system**
 - ① Insufficient internal control system for responding to complaints
 - ② Insufficient effective monitoring system regarding the status of explanations to customers
 - ③ Insufficient governance by management

1. **Situation of long-term and continuing solicitations that violate the suitability principle**
2. **Insufficient situation of posture for compliance with the suitability principle**

Cause analysis*2

1. Problems in the operational control environment (incentive mechanism)

A system in which structured bonds with a high rate of return to earnings are evaluated relative to the volume of work, and there are no administrative tasks that are complicated compared to investment trusts and insurance
 Preference for selling structured bonds, but underestimation of problems and risks associated with structured bonds

2. Problem in the internal control system

① There were three elements of ① motivation, ② opportunity, ③ justification for 1st line (branch and sales division).

(Motivation) Performance awards and personnel evaluation mechanisms to motivation and pressure of bank employees

(Opportunity) Malfunction due to formal confirmation by the internal administration supervisor, etc.

(Justification) Rewarded by achieving the target, customers ask for explanations,
 Bad sense of security that the ultimate sales responsibility lies with Chibagin Securities

② Problem in risk detection for 2nd line (management division) and 3rd line (audit division) and inadequate response for the detected risks

3. Problem in business management system

① Group governance issues (problems in grasping the current situation, identifying issues, and managing the progress of instructions)

② Problems in organizational culture (problems in business operation system: situation where management is unable to respond appropriately)

1. Motivation (pursuit of profits)

① Management's stance of strongly pursuing earnings, ② Mechanism for achieving highly established earnings targets, ③ Evaluation system that emphasizes performance-based evaluation for individuals, ④ Issues such as human resource development

2. Opportunity (check-and-balance malfunction)

- ① 3 lines management was not fully functioning
- ② Inadequate response to the complaint
- ③ Problems in the process of selecting products to sell
- ④ Inadequate checks and balances by Chiba Bank

3. Justification (pressure from the bank as the referral source)

Relationships with the staff of Chiba Bank and Musashino Bank lead to justification for improper behavior for those in charge of Chiba Securities, resulting in cases in inducement to structured bonds with inadequate confirmation of suitability and customer attributes.

4. Business Management System, etc.

Revenue from sales of structured bonds is important for the management of Chibagin Securities, and dilution in all tiers, including the management of the most securities, in terms of compliance with the suitability principle.
